Prediction Result: Tumor Detected: Glioma

Confidence: 99.82%

MRI Scan:

Trusted Advices For You:

You have been diagnosed with a Glioma brain tumor.

Gliomas are tumors that arise from glial cells in the brain or spine. Management often depends on the grade and location of the tumor.

Medical & Treatment Options:

- Consult a neuro-oncologist or neurosurgeon for treatment planning.
- Treatment may include surgery, radiation therapy, and chemotherapy.
- Regular MRI scans to monitor tumor progression.

Lifestyle & Supportive Care:

- Follow a balanced diet and stay physically active as advised.
- Consider physical therapy if there are movement issues.
- Join a brain tumor support group for mental well-being.

Watch For Symptoms:

- New or worsening headaches.
- Vision changes, seizures, or cognitive decline.
- Weakness or balance issues.

Note: Early and aggressive treatment improves prognosis in most glioma cases.
