Prediction Result: Tumor Detected: Meningioma

Confidence: 100.00%

MRI Scan:

Trusted Advices For You:

You have been diagnosed with a Meningioma brain tumor. Meningiomas are typically benign and slow-growing tumors that form in the membranes covering the brain and spinal cord.

Medical & Treatment Options:

- Observation is possible for small, non-symptomatic tumors.
- Larger or symptomatic tumors may require surgery or radiosurgery.
- Routine MRIs to monitor growth.

Lifestyle & Management:

- Maintain a healthy routine with enough rest.
- Manage stress and anxiety levels.
- Seek neuropsychological support if cognitive symptoms appear.

Symptoms To Monitor:

- Vision problems, headaches, or seizures.
- Changes in memory or concentration.

Note: Many meningiomas can be managed effectively with regular follow-up.
